SERVICE AGREEMENT

This agreement is made by _____
("Customer") and Lake Kiowa Special Utility District (the "District") and is effective upon approval and acceptance by the District as shown below. The District will maintain a copy of this agreement as long as the Customer and/or the property is connected to the District's water system. The District and Customer must execute this service agreement before the District provides service to Customer.

The District agrees to provide retail water utility service to Customer at the property described below, and Customer agrees to pay all applicable fees for such service, in accordance with the Rate Order of the District, as amended.

All bills shall be due and payable upon receipt and are past due beyond the date indicated on the bill; allowing approximately fifteen (15) days to pay. A one-time penalty of \$10.00 or 5.0%, whichever is larger, shall be applied to delinquent bills. A monthly bill for utility service is delinquent if full payment, including any outstanding late fees and regulatory assessments, is not received at the District by 4:30 p.m. on the due date. Payments made by mail will be considered late if received after the past due date. If full payment is not timely received by the District, a final notice shall be mailed allowing ten (10) additional days for payment prior to disconnection. If Customer's service is disconnected, the District shall charge Customer a Reconnect Fee (\$50.00 during regular business hours and \$75.00 if after regular business hours) before restoring Customer's service. The District's regular business hours are from 8:00 a.m. to 4:30 p.m., Monday through Friday.

Customer agrees to comply with the District's Drought Contingency Plan in the event the District's total water supply becomes insufficient to meet the needs of all District customers.

All water furnished by the District shall be metered by meters installed, maintained and owned by the District. The meter and connection is for the sole use of Customer and is to provide service to only one (1) dwelling or one (1) business. Any attempt to tamper with or to by-pass a meter, or to divert water utility service from one property to another, or to share, resell or sub-meter water to any other person, dwelling, business or property is prohibited. Unauthorized users of District services shall be prosecuted to the extent allowed by law under the Texas Penal Code § 28.03.

If required by the District in its sole discretion, the Customer agrees that the Customer and all persons or entities owning an interest in the property served by the meter will execute before a notary public the District's standard waterline easement adopted by the District pursuant to its Rate Order. At the sole option of the District, this requirement is a prerequisite for water service from the District.

The District shall have the right to select the location of the water service meter, pipe and appurtenant equipment on Customer's property necessary to connect Customer to the District's water system. The District shall have access to its meter and equipment located on Customer's property at all reasonable times for any purpose connected with or in the furtherance of the District's business operations, and upon disconnection or discontinuance of service, the District shall have the right to remove any of the District's property from Customer's property.

The District is responsible for protecting the drinking water supply from contamination or pollution, which could result from improper plumbing practices. This Service Agreement serves notice to each customer of the plumbing restrictions in place to provide this protection. The District shall enforce these restrictions to ensure the public health and welfare. The following unauthorized practices are prohibited by state regulations:

- (1) Direct connections between a public drinking water supply and a potential source of contamination are prohibited. Potential sources of contamination shall be isolated from the public water system by an air gap or an appropriate backflow prevention assembly in accordance with state plumbing regulations. Additionally, all pressure relief valves and thermal expansion devices must be in compliance with state plumbing codes.
- (2) Cross-connections between a public drinking water supply and a private water system are prohibited. These potential threats to the public drinking water supply shall be eliminated at the service connection by proper installation of an air gap or a reduced pressure-zone (RPZ) backflow prevention assembly and a service agreement must exist for an annual inspection and testing by a certified backflow prevention inspector.
- (3) Connections that allow condensing, cooling, or industrial process water to be returned to a public drinking water supply are prohibited.
- (4) Beginning July 1, 1988, pipe and pipe fittings containing more than 8.0% lead may not be used to install or repair plumbing at any connection that provides water for human consumption.
- (5) Beginning July 1, 1988, solder or flux containing more than 0.2% lead may not be used to install or repair plumbing at any connection that provides water for human consumption.
- (6) The installation of any plumbing fixture not in compliance with a state approved plumbing code is prohibited.

The District shall maintain a copy of this Service Agreement as long as the Customer and/or premise is connected to the District's water system. The Customer shall allow the District to inspect the Customer's property for possible cross-connections and other unauthorized plumbing practices during the District's regular business hours.

The District shall notify the Customer in writing of any cross-connection or other unauthorized plumbing practices found by the District during the initial or subsequent inspections. The Customer shall immediately correct any unauthorized plumbing practice on their premises. The Customer shall, at Customer's expense, properly install, test and maintain any backflow prevention assembly required by the District. Customer shall provide the District with a copy of all backflow prevention assembly test and maintenance records. Failure to comply with the terms of this Service Agreement shall cause the District to either terminate service or, at its sole discretion, to install, test and maintain an appropriate backflow prevention assembly at the service connection. Any expenses associated with the enforcement of this Service Agreement shall be billed to the Customer.

By execution hereof, the Customer shall hold the District harmless from any and all claims for damages caused by service interruptions due to waterline breaks by utility or like contractors, tampering by other persons or customers of the District, normal failures of the system, or other events beyond the District's control.

By execution hereof, the Customer expressly agrees that Customer's failure to comply the terms of this Service Agreement shall entitle the District to deny or discontinue service until such time as the violation(s) are corrected to the satisfaction of the District.

Any misrepresentation of facts by the Customer on this Service Agreement or the Service Application shall entitle the District to deny or discontinue service pursuant to the terms and conditions of the District's Rate Order.

(Please initial in the space below upon reading the following)

_____ Customer acknowledges that the District's water system provides potable water for domestic consumption only and may not provide "fire flows" to the Service Address below as defined by the Uniform Fire Code or similar code or regulation to fight structure fires.
